Company information for "Supplier Evaluation"

Dear customer, according to your need of information for the "Supplier Evaluation" requested by your Quality Management System, Sirmax prepared its own form with usually requested information, included copies of quality and environmental certificates.

We apologize for not answering through your form, but our form is for sure the quickest and most complete way to answer to your questions.

Additional information could be retrieved at www.sirmax.com or contacting us at marketing@sirmax.com

General data and organization of Sirmax Group (excluding JV Autotech-Sirmax)

- SIRMAL produces compounds including PP, ABS, PS, PC/ABS, PC, POM, PA, PPO, PBT, PMMA, TPE, rPP, rHDPE, Biopolymers, Green Compounds and distributes a wide range of polymers on behalf of our partners. The 11 production facilities worldwide have 58 twin-screw extruders with a total production capacity of 363 ktons. 605 Employees worldwide; production runs continuously in three shifts.
- SIRMAL has six advanced laboratories for research and development, located in Cittadella, San Vito al Tagliamento, Mellaredo di Pianiga, Salsomaggiore Terme, Anderson and Kutno with thirteen additional extruders for the development of new materials, serving all the other plants around the world.
- SIRMAL's most important customers are manufacturing companies in the fields of injection molding for home appliance, automotive, electrical, and electronic, furniture, building & construction and packaging.
- SIRMAL's sources are suppliers that are the main petrochemicals and thermoplastic producers or the main suppliers for additives, masterbatches and filler such as Basell, Borealis, Sabic, BASF, Bayer, Imerys, Reagens, etc.

Each productive plant of SIRMAL:

- has got a laboratory equipped for quality control that can control rheological, mechanical, chemical and physical characteristics of polymers, according to ASTM and/or ISO standards. The instruments are checked and calibrated with fixed frequency. The laboratories release a certificate of analysis for each lot delivered to the customer.
- has a mechanical workshop with a warehouse for plant maintenance and spare parts in each productive facility.
- has a logistic network independent but regulated by the Company's standards; employs professional transporters for deliveries to customers, performing them according to the agreed specifications. The product is delivered in 25 Kg bags, big bags, octabins, auto silos container. For each delivered lot SIRMAL can send a certificate of analysis or compliance, and for each product a technical data sheet is available. Payment conditions are fixed in the quotation.

Average of days between order and delivery: 25 days, depending on the kind of product. For every customer SIRMAL can reserve a safety stock in its warehouses, depending on the quantity delivered and the frequency of the orders.

Operates with certified Management System; upon agreement the Customer is welcome to audit Sirmax plants.
